

```
mgr.notify(NOTIFY_ME_ID, note);
}
}
```

This activity sports two large buttons: one to kick off a Notification after a 5-second delay and one to cancel that notification (if it is active). The NotifyDemo activity main view

Creating the Notification, in `notifyMe()`, is accomplished in six steps:

1. Get access to the Notification Manager instance.
2. Create a Notification object, a message to flash on the status bar as the Notification is raised and the time associated with this event.
3. Create a PendingIntent that will trigger the display of another activity (NotifyMessage).
4. Use `setLatestEventInfo()` to specify that when the notification is clicked we are to display a certain title and message, and if that's clicked, we launch the PendingIntent.
5. Update the number associated with the Notification.
6. Tell the NotificationManager to display the Notification.

Our notification as it appears on the status bar, with our status message

The notifications drawer, fully expanded, with our notification. **d**
