

```

android:name=".EmergencyResponder "
android:label="@string/app_name">
<intent-filter>
<action android:name="android.intent.action.MAIN" />
<category android:name="android.intent.category.LAUNCHER" />
</intent-filter>
</activity>
</application>
<uses-permission android:name="android.permission.RECEIVE_SMS"/>
<uses-permission android:name="android.permission.SEND_SMS"/>
<uses-permission
android:name="android.permission.ACCESS_FINE_LOCATION"
/>
</manifest>

```

3. Modify the main.xml layout resource. Include a Listview to display the list of people requesting a status update and a series of buttons for sending response SMS messages. Use external resource references to fill in the button text; you'll create them in Step 4.

```

<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="fill_parent"
    android:layout_height="fill_parent">
    <TextView
        android:id="@+id/labelRequestList"
        android:layout_width="fill_parent"
        android:layout_height="wrap_content"
        android:text="people want to know if you're ok"
        android:layout_alignParentTop="true"
        />
    <LinearLayout
        android:id="@+id/buttonLayout"
        xmlns:android="http://schemas.android.com/apk/res/android"
        android:orientation="vertical"
        android:layout_width="fill_parent"
        android:layout_height="wrap_content"
        android:padding="5px"

```
