

we recommend you get the restricted codecs installed. Run the following commands on the Ubuntu desktop:

```
• sudo apt-get install libxine1-ffmpeg gxine mencoder
mpeg2dec vorbis-tools id3v2 mpg321 mpg123 libflac++6 ffmpeg
libmp4v2-0 totem-mozilla icedax tagtool easytag id3tool
lame nautilus-script-audio-convert libmad0 libjpeg-progs
libquicktime1 flac faac faad sox ffmpeg2theora libmpeg2-4
uudeview flac libmpeg3-1 mpeg3-utils mpegdemux liba52-0.7.4-
dev
```

and

```
• sudo apt-get install gstreamer-dbus-media-service
gstreamer-tools ubuntu-restricted-extras
```

This should take care of almost all type of videos you want to play. You may also like to install mplayer for videos. Mplayer is another player which can play almost anything.

Images

We love to go back in time, into the memories which make us feel good. The trip with friends, the awkward situations, the lovely visits by our dear friends. Pictures say millions of words and they do so even more

Editing images: Shotwell can take care of basic picture management and editing tasks
