

HTML5 – FEATURES

Here's the real deal. All you can experience in HTML5 – features, functions and innovations.

Ever since its introduction, HTML has been in continuous evolution. Different features have been introduced at different points of time, some being introduced in specifications while others were introduced in software releases.

Components of HTML5

The design principles of HTML5 have been spelled out in the WHATWG specification as follows:

Compatibility

At the core of HTML5, is the desire to keep everything working smoothly. The motto is evolution not revolution.

Utility

The HTML5 specification is written based on a one-line priority order - “the
