

Event handlers are also declared to support user interactions with the application.

protected:

- `Osp::Graphics::Bitmap * _ _pBadaBitmap;`

public:

- `virtual result OnInitializing(void);`
- `virtual result OnTerminating(void);`
- `virtual result OnDraw(void);`
- `virtual void OnOrientationChanged(const Osp::Ui::Control &source,
Osp::Ui::OrientationStatus orientationStatus);`

2. PrivilegePanel.h Header File

The Privilege panel displays two `Osp::Ui::Controls::Button` instances, and the header file declares action IDs for the buttons, to allow the `Osp::Ui::IActionEventListener` interface to track button presses.

class PrivilegePanel:

- `public Osp::Ui::Controls::Panel,`
- `public Osp::Ui::IActionEventListener`
- `{`
- `public:`
- `PrivilegePanel(void);`
- `virtual ~PrivilegePanel(void);`
- `public:`
- `result Initialize(Osp::Graphics::Rectangle rect);`
- `void UpdatePanel(void);`
- `protected:`
- `static const int ID_BUTTON1 = 101;`
- `static const int ID_BUTTON2 = 102;`
- `public:`
- `virtual void OnActionPerformed(const
Osp::Ui::Control& source,
int actionId);`
- `};`

To Create the Image Panel

1. There are 2 important methods called when the Image panel
