

CELLPHONE PHOTOGRAPHY

You don't necessarily need a dSLR to capture amazing photographs and that's exactly what we explore in this section

If you are the kind for whom the mobile and its inbuilt camera is always on and the digital camera at home is gathering dust, then this article can be very useful for you. These days, camera phones have flooded the market. With many choices available, you are confused as to which one to buy. This wasn't always the case. Just a few years ago, photos from phone cameras came out pixelated and poorly lit. No way would you have thought of ditching your regular camera for camera phones. But as smartphone makers have increasingly realised the potential of the built-in camera, there have been a deluge of phones with cameras that can match and sometimes outperform low-end dedicated devices in a snap.

Features to look for in camera phones

The question now stands what you must look for in phone cameras. Well, first and foremost you must look for those with 5-megapixel or higher resolu-
