

- Here you can manually choose your SSID and select the security mode.
- Click on the Security mode dropdown box and select WPA2 security.
- Enter your desired password.
- To check your usage, go to **View > Usage** and select the Current Month tab or the Previous Month tab. You can also control usage using the connection manager.
- Open the connection manager.
- Select **Tools > Preference** and select the Usage tab.

Secure your Network

Setting the right limits

- After checking the “Limit by Data” checkbox, you can put in a limit on your use. Once you’ve exhausted this limit, you’ll be disconnected automatically.

Additional features

Now that you know how to connect to the internet, let’s look at how you can use this pocket router to send text messages to other phones. The D-link router can be used to perform all the text messaging functions that can be done on a mobile phone such as sending, receiving, replying, forwarding and deleting.

- To start messaging, click on the SMS tab in the connection manager.
- Click on “New message” to compose a new message. Enter the recipient’s phone number or select it from your contacts stored on your SIM
