Kaspersky Lab's newest innovation – the Kaspersky Endpoint Security 8 suite helps you fully protect and control changing IT environments.

Solution Offerings:

- ▶ **Work Space Security:** Protection for workstations, laptops and smartphones.
- ▶ **Business Space Security:** All of the above plus protection of file servers.
- ▶ **Enterprise Space Security:** All of the above plus protection of mail and groupware servers.
- ▶ **Hosted Security Services:** Hosted protection for business-critical processes such as email and Internet use.
- ▶ **Total Space Security:** Multi-layer protection for workstations, laptops, smartphones, mail servers, groupware servers and Internet gateways.

Key highlights:

- ▶ **Application Startup Control:** Provides administrators with the ability to grant, block and audit application launches.
- ▶ **Administrator-based Whitelisting:** Provides administratively assigned and cloud-assisted predefined cat-

egories of whitelisting rules for application startup control.

- ▶ **Application Privilege Control:** Applies restrictions to various actions of applications in the operating system as well as rights to access computer resources.
- ▶ **Vulnerability Scanning:** Prevents potential exploits by identifying system weak points, missing patches and neglected application and OS updates.
- ▶ **Device Control:** Allows granular control of external device operations – enforces usage policies and reduces the risk of data loss.
- ▶ **Web Control and Content Filtering:** Monitoring and filtering users' browser activities by category, content and data type, regardless of workstation location.
