

Jailbreaking HTC devices

When it comes to HTC devices, they have what is probably the most versatile device currently available, the HTC HD2. This phone can run Android, Win-

dows Phone Mango, Windows Mobile 6.5 and even variants of Ubuntu and Meego. If you've got this phone, you've hit the jackpot as far as rooting and custom ROMs go.

HTC also manufactures the only second generation Windows Phone devices to be jailbroken so far, the Radar and Titan.

The rooting of HTC devices is far more complicated than that of Samsung devices and is in fact, beyond the scope of this book, probably requiring a fast-track of its own. The basic points to remember about HTC devices are these:
