

“...” in the top-right corner and select the product code which is a 7 digit number which often starts with 05. Example - 0524529. Select your language pack and tick “Dead Phone Flashing”.

9. Press “Update Software”. If the phone fails to turn on then retry and choose “Refurbish” this time. Then follow whatever instructions that proceed. You may be prompted to press the power button after connecting the USB cable.

The phone will begin flashing and should get completed successfully. If not then try again till it does. Swapping the USB ports does help sometimes.
