

seem a little distant. The hacking kit that we explained above works only on Canon, one of the most popular brand. Currently, research projects are underway for Nikon (<http://dgit.in/KLSV10>), Pentax (<http://dgit.in/MswHbf>), Panasonic (<http://dgit.in/NbDSvk>), Sony and other brands. These are open forums. So if you think you know about software/hardware/firmware hack to supercharge your camera, then you can always contribute.
