

Cons

You cannot Remove or Customize Weebly footer with a free account. Also, its not recommended for people who need FTP access and MySQL databases and need to run PHP scripts etc. Weebly is for personal and business websites who require easy interface and not for developers who want more control over their websites/apps.

Webs

(<http://www.webs.com>)

Webs is another popular service in the banner of Weebly. It provides similar features and a very powerful interface.

Pros

Webs provides you with powerful Site Building Tools and templates. It also gives you Search Engine Optimization (SEO) techniques which can help you increase the ranking of your website. it supports Mobile Sites. It gives you 24/7 Customer Support and Free Domain Name with Email Addresses. It also provides you detailed traffic stats and SEO Features as weebly does.

Cons

One major disadvantage is that Webs is not Ad-Free. Also, It does not provide unlimited storage and bandwidth as compared to Weebly. It supports upto 0.5GB Bandwidth and 40 MB Web Storage . It does not allow video Storage for free Accounts. It also does not provide FTP Access and running PHP Scripts .

Webs and Weebly are both used by business for E-Commerce websites and for personal websites and portfolios by general people.

Wix

(<http://www.wix.com/>)

Wix also falls into the category of websites that provide you free hosting with powerful website builder.

Pros

Creating your own website using wix is very easy using the powerful Wix drag and drop editor. All Wix websites are SEO optimized and have a mirror HTML site to help your website get better index
