

app. Blast space invaders with your smartphones; stand up and fight in 360 mode, or sit down for 180 mode. You can even recruit an army with your friends in multiplayer mode. Stand up and fight for Earth, because these aliens are everywhere you point your smartphone.

7. Theodolite

Price: \$3.99

Platform: iOS

Are you one of those people who want to know the altitude, temperature and other geographical features of every place? You're in luck! This app is great for adventurers, architects, engineers and

search and rescue guys. It gives you the topographical scenario of your surroundings, overlaying the information on the image from your smartphone/tablet's camera. It even lets you learn your elevation, inclination; it works as a compass, GPS, and a range-finder. So the next time you go hiking, this app will come in handy.
