

Windows 8 Snap Apps feature

pixels) is sufficient, the width of the display (1200 pixels) is lower than the minimum required.

Editions to choose from

As a home user, you have just two editions to choose from – Windows 8 and Windows 8 Pro. There are two other versions – Windows 8 RT and Windows 8 Enterprise which you can't purchase off the shelf. Windows 8 Enterprise is aimed at businesses and features capabilities mostly useful only to enterprises, while Windows 8 RT comes pre-installed on tablets. Windows 8 RT edition is aimed at the ARM processor and can't be installed on a normal PC.

Coming back to the options Microsoft has left us with, the differences between the two editions are based on features provided. Windows 8 hosts the most common features a home user would need and the Pro edition will satisfy the guys with a demand for advanced features. The following is a list of the features new to Windows 8:

1. Trusted Boot or Secure boot prevents boot-time viral code injection into memory and makes sure that you're secure right from the start.
2. Picture Password allows you to use a picture as your password. You draw a pattern on a picture which is used as a password.
3. The start Screen features a grid of dynamically updating tiles that represent apps.
4. File History lets you see past versions of your files.
