

iReddit

Reddit is the most happening place on the internet. You have everything here, right from serious discussions to hilarious exchanges between community members. Sometimes, you also

have big personalities making an appearance and users get a chance to interact with them. Get the official app to get all the user-generated and moderated threads on the popular site. You can vote, comment, share and save links for later reading. Also, just shake the phone to randomise the content. For Android, try Bacon Reader to access Reddit and for Windows

Phone, give Baconit a spin.

Amazon Kindle

Although it sells devices of its own, Amazon Kindle is also a free app available on all major platforms. Books purchased from the online store automatically find their way to the app. It syncs what you're reading at the moment, bookmarks, notes and highlightings across all other devices where you've logged in. There's plenty of free content on the Bookstore to consume and you can try out the first chapter of a paid book before buying it. A built-in dictionary feature helps you with word meanings while you're reading. If Amazon didn't fancy you much,

try Kobo instead.
