

Wattpad

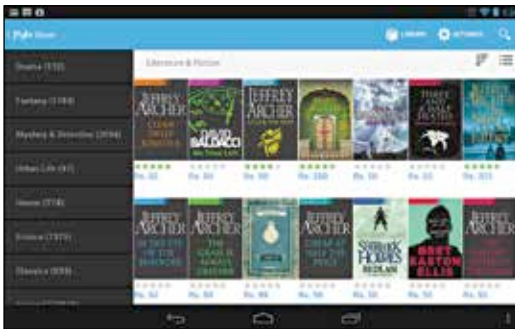

Wattpad is a community-fueled service that has over 10 million books and stories to consume. Its app, which works on phones and tablets, allows you to browse through the wide array of categories including sci-fi, fantasy, mystery, romance and thrillers. It has tied up with popular authors who'll help inspire amateur writers to create beautiful literature. You have the usual eBook reader app options like customizing the font and brightness according to your reading comfort. The app syncs your

content if you have it installed on multiple devices.

Flipkart Flyte eBooks

The Flipkart app will let you access its 'Flyte' eBook section. You can buy books directly through the app and sample one before

purchasing. Then you've got the usual eBook features such as syncing across multiple devices, text highlighting, note-taking, bookmarking etc. An offline dictionary is also thoughtfully built in, so that you can look up words even when the device is not connected to the internet. There's also a dark background mode which should be a treat for AMOLED screens and

easy on the eyes at night.
