

Press Reader

Although all the apps above optimize web-based content for handhelds, some people may still want to read the good ol' newspaper on their tablets or phones. Press Reader brings 2,300 actual newspapers from 97 countries onto your device. You can either read content as-is, or click the headline to get a handheld optimized view, which in turn takes you to new content discovery. You can buy a single paper or

a full membership for access to all that's available.
