Tab Pro

Tab Pro is a guitar tablature app for smartphones. This app is super helpful if you want to learn to play a song on the guitar. It gives you access to

over 80,000 songs. A virtual fret-board tells you which fingers to hold where on the guitar. You can slow down the tempo if it's too fast for you, or even keep looping a portion of a song till you get it right. You can also choose different instruments within a song (rhythm, solo or acoustic guitar). Once you're confident that you've nailed it, the app allows muting of any instrument so that you can jam along with the rest of the virtual instruments.
