

Plex

Plex Media Center is a media management app, whereas Plex Server is a media server app for computers. The mobile version of these apps lets you browse through the catalog of movies, TV shows and music stored on your computer right from your device and play them on your handheld. Whatever be the format of the media on your PC, Plex converts it on the fly before streaming to the phone or tablet,

making it a seamless experience. You can also use the app as a remote control for the Plex Media Center.

8tracks

The concept of mixtapes may seem like it's been long forgotten because of the digitization of music but it exists in a new form. Upload your combination of eight or more genuinely purchased songs, and your mix can be shared with the rest of the world. There are categories according to the mood, genre, occasion or artist. It also has a social element where you can 'follow' or 'like' other DJs' compilations. They also have a subscription that removes ads for listeners and adds features to DJs who contribute their playlists.
