

PHOTOGRAPHY AND VIDEO EDITING

You don't need to be a professional
photographer or own a DSLR to click
stellar pictures. Your smartphone
coupled with these apps is all you need

With the rise of smartphones, the one thing that comes to us naturally these days is clicking pictures and shooting videos. Carrying a pocket camera or a camcorder all the time – let alone a bulky DSLR – is quite a pain.

Smartphones double up as compact cameras eschewing the need for yet another gadget. Besides snapping stellar photos and videos, we can also edit and share them without needing to switch over to a computer. There are many apps designed for the very purpose while on the go. Be it at a meeting, a roadside stall or a dinner table; our Generation Y fingers are busy instagramming and vine-ing. After downloading over 50 apps and clicking innumerable self-portraits and videos, we've shortlisted a list of useful apps that'll help you click, tweak and share your favourite moments with the world.
