

Camera ZOOM FX

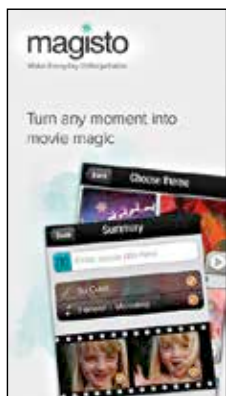

Most smartphones these days come with decent cameras. But there are tons of apps out there that enable your decent camera to click stellar pictures. One such app is Camera ZOOM FX. It's one of the best camera and photo-editing apps on Android. The app lets you click up to 10 shots per seconds and add instant effects, overlays and grids to them. What we absolutely love about Camera Zoom FX is that though the app looks extremely professional it's very simple to use. Camera ZOOM FX also offers interesting professional photography features such as photo bursts, stable shot, video switch and sound activations that we absolutely loved.

Magisto

If you love capturing your favourite moments on videos, we reckon you get the Magisto app. Magisto is a free video editing apps that lets you shoot videos, edits them automatically and adds music to your videos. In a nutshell, Magisto converts your average videos into high-quality movies that you can share with people around you. The best feature of Magisto is that it automatically recognizes the best parts of your video and edits them together to create that perfect video. Not to forget, it also lets

you choose from an extensive collection of music – ranging from Gangnam Style to Bangarang – to your videos. That, and the fact that it was a winner of the 2012 CES Mobile Apps Showdown, makes Magisto a must-have video editing app on your mobile.
