

Dropbox: Free(2GB) and Premium (100 GB)

File-synchronization, data backup and sharing used to be a nightmare until cloud-based applications happened. And one of the most noteworthy cloud-based applications that you can't go wrong with is Dropbox. The app lets you sync files between your PC and mobile devices seamlessly and store all your files in a single folder. Once you have the Dropbox app on your mobile, you can access all your files on-the-go, even when you're offline. Dropbox app also lets you share your files and data freely with

friends and family. Effortless synchronization, clean interface, easy accessibility and safe sharing make Dropbox a must-have productivity app on

your mobile phone.

Astrid Task List/To-Do

If you're someone who needs to be motivated by friends and family to get tasks done, Astrid Task List/To-Do is the app you must get your hands on. The app lets you create to-do lists and share them with your family and friends. The Astrid app helps you keep a track of your tasks and sends you reminders and alerts regarding your task during the day. The highlight of Astrid Task List/To-Do is the collaborative list function. It's the personal

assistant you've always wanted.
