

Zomato

In India, food is considered to be a reflection of our culture and ages. No wonder most of us are such foodies. The one question that we battle almost every time we step out is 'what/where to eat today?' Thankfully, Zomato.com understands our problem and has an app to address all our food-related dilemmas. The Zomato app recommends and helps you search for restaurants within your city. Based on your phone's GPS location, the Zomato app lets you locate eateries in the vicinity, check their menus, read customer

reviews and even make reservations. So next time, just shake your phone and

let Zomato explore the restaurants that will satiate your appetite.

Cleartrip

Do you spend most of your time chasing travel agents to book flight tickets and make hotel reservation? Well, then you must get Cleartrip's clutter-free app on your phone. The app lets you book flight and train tickets and make hotel reservations on-the-go. Just like the website, the app accepts credit cards, debit cards and payment via net banking for your reservations. The Cleartrip app is clean, simple and user-friendly. In fact, Cleartrip on iOS also supports Passbook for your bookings. Not to forget, the app's available free for download on almost all platforms. So what are you waiting for? Delete that travel agent's number right away and switch

to Cleartrip now!
