

What's On India

Couch potatoes will love the What's On India app. What's On India is your TV guide on your phone. With the growing number of TV channels, staying in tune with what's playing on what channel can be a pain. The What's On India app tells you what show/movie is playing on what channel and at what time, without needing you to actually switch the TV on. What's awesome is that this app also lets you set email and SMS reminders so that you'll never miss out on a single episode of your favourite show. Oh, and before we forget, it's available

for free across most platforms.

IRCTC

Gone are the days when you had to spend endless hours waiting in queues or on the IRCTC website to book railway tickets. With the IRCTC mobile app, booking tickets is now a walk in the park. All you need to do is download the IRCTC mobile app, make your bookings and payment and carry some kind of identification proof while commuting. Yes, you read it right; you don't even need to carry printouts of the ticket. You can now show your virtual ticket on your phone and travel

comfortably. Thanks to the IRCTC mobile app, travelling via Indian Railways

just got a little classier.
