

Burrrp

The one website that we've all used for recommendations for food, nightlife, beauty, fitness, shopping, events and as a movie and TV guide would be burrrp.com. Our favourite website is now available as a free app on our mobile phones. With a clean and simple-to-use interface, the burrrp app offers ratings, phone numbers, addresses and directions for various businesses and services. One of the best features of the Burrrp app would be its support of Google Maps integration, which makes locating addresses very

simple. Plus, it's available for free. Need we say more?

BookMyShow

Besides food, another thing that we naturally love is movies and entertainment. Bookmyshow.com is India's largest online ticket booking websites that lets you book tickets for movies, theaters, musicals and sports. And thanks to the BookMyShow mobile app, you won't have to switch on your PC to book your tickets. The app lets you search and find what movie is playing at what movie theater and at what time, right on your phone. Clean interface, simple UI and easy bookings make BookMyShop a great app for making those impromptu

Friday night movie plans.
