

EyeEm

Windows Phone hasn't been blessed with Instagram yet, but that doesn't mean you can't use alternatives. EyeEm works on the platform, and has 11 different types of photo filters such as Vintage, Vanilla, Strawberry etc. that'll make your photos look (ahem) cool. You have a profile where you can create your feed. "Albums" are categorised public folders where users can upload their work. Here, you could also discover photos by other like-minded people.

square and Tumblr.

PC Remote

This app converts your phone into a full-fledged remote control for your PC. From a distance, you can control the mouse pointer with all the gestures that Windows 8 supports. You can type on your computer using the QWERTY on the phone. While watching media, you can control volume, interact with media playback controls on YouTube, Winamp, iTunes, VLC, XBMC, Media Player Classic etc. While delivering PowerPoint presentations, the app can be used to control the slideshow. You can

remotely shut down, restart, sleep, log out of and even turn off your

computer monitor.
