

Lookout Security and Anti-Virus

This is a mobile security app, but it goes beyond just plain scanning for viruses and malware. It has a backup feature that will back up your contacts and photographs. The Missing Device feature allows you to geo-locate your phone if it goes missing. Its Signal Flare feature sends an email with the right location of the phone when the battery is critically low. An option called Scream will activate a loud alarm (even when the phone is on silent) if your phone is nearby and you can't find it. Remote wiping and locking features are available if you upgrade to the premium account for \$2.99. If your cellphone has all your critical data, it makes sense to upgrade

to the premium account.

Price: Free (Premium account costs \$2.99)

Safely Go

There may have been countless number of times when you're driving your car or riding your bike and you get a call. It's not advisable to take your eyes off the road to answer that call. The Safely Go app will let you drive without any distractions. It allows calls only from three VIP contacts and automatically messages the others that you're driving. It enables calls through your Bluetooth or other hands-free device. It also gives you access to three apps: music, maps or navigation (by default) and

any other app you may want active.
