

ZOMBIES (on teh phOne)

ZOMBIES (on teh phOne) (henceforth Zombies) like most Windows Phone exclusives debuted on the Xbox and was ported to Windows Phone. Zombies is a birds eye view shooter that you control with an on screen directional pad and a shoot button. The music will remind you of old punk music and coupled with the flashy visuals, you won't see the zombies coming and

will be “dedz!”, as the game puts it. The WP version of the game has two more modes than the Xbox version that are Time Viking and ENDL3SS ZOMBIES!!!! I MAED A GAM3 W1TH ZOMBIES 1N IT!!!! is the same as the Xbox game. Time Viking has you play as a Viking travelling through the future to be assaulted by ninjas and a cat with a laser beam on its head. This mode is a side scroller as opposed to a bird's eye view one like the first one. Endless Zombies has an instrumental background track that is a lot less distracting and is otherwise more or less the same. Zombies has Xbox

achievements as well, and is well worth the price of entry.
