

Settings

Although this is the first option you see, we're coming to it last because it's the one that needs the most explaining.

Display and Actions

You can choose the default view of the browser, and set it to either Show my Home Page or Show Last Tabs. You can choose to open the browser to a specific page, set whether to Open Links for New Tabs in the Background, whether you want Search Suggestions, Adobe Flash support, Audio Feedback, set the Font Size and choose the text encoding.

Privacy and Security

Here you can choose how the browser history is handled (Delete After One Day / One Week / Two Weeks / One Month / Two Months / Six Months / One Year), turn Private Browsing of or off, choose whether to Block Pop-ups, Accept Cookies, select Site Exceptions, Clear History of the browser, and Clear Cookies and Other Data
