Hard Disc Drive

The internal hard drive is something we've all known about whether we have a PC or not. It is the main source of storage space with the ability to store any type of data of varying sizes.

Displays, chassis and Audio Cards

Now that most internals of the PC have been covered we'll move on to the case in which you house your components and the screen on which you'll see your PC come to life. We also cover Audio cards for the discerning few who want to indulge more than a few senses and Power supplies to power your creation.

IO Devices

Keyboards, Mice and other peripherals complete your PC requirements. But there's a lot more to these ancillary components than meets the eye.

Networking

Great now that you know everything about what goes into a PC, how do you make it connect to the outside world? After all a lonely PC is a sad PC.
