

- ▶ As compared to real time board, which offers almost everything but video conferencing, the free version of Concept Board allows just 5 guests.

#### Who is it for?

Concept board is great for designers in creative industries such as advertising, graphic design, concept art etc who need visual collaboration regularly. Also, concept board provides an additional layer of a web conferencing tool, so if you need a video conferencing facility along with a white board tool, you should choose Concept Board over any other software in this list.

#### Pricing:

It's free for non-commercial use, and provides 1 user account and 5 guests only with a limited area of 5 square meters (about 80 pages). For more features including team features as well as security, you need to upgrade to a premium account.

### BAIBOARD

[www.BaiBoard.com](http://www.BaiBoard.com)

Baiboard is a live collaboration white-board app for iPad and Mac and has one of the most intuitive interfaces among all the others. Its small and sweet with limited features.

Realtime collaboration with BaiBoard

#### Pros:

- ▶ It allows you to collaboratively annotate, e-sign and seal digital documents.
- ▶ It provides secure encrypted storage for free unlike the others.
- ▶ It allows you to take snapshots of your board and save and retrieve them almost instantly.
- ▶ You don't need any signup or registration.
- ▶ Allows sync with between Mac and iPad version in real-time.

#### Cons:

- ▶ Its only available for Mac and iPad, and Mac version has less features.
- ▶ No support for word processor documents and spreadsheets.
- ▶ No integration with Google Drive etc.
- ▶ Limited editing features.
