

Storage & Backup. Upgrades for 10 GB (for ₹1,100/year), 20 GB (for ₹2,200/year) and 50GB (₹5,500/year) are available.

iCloud Backup is the best choice if you want the backup to be periodic, if you want the backup to happen anywhere you are connected to wi-fi and if you don't have a Mac/Pc or if you don't want to connect to one. iCloud saves your data on the cloud storage of Apple and hence is more durable than storing on your computer.

iCloud doesn't backup anything that you didn't purchase from the iTunes Store or the App Store. It may not be able to restore any previous purchases that are no longer in the iTunes or App Store or iBooks Store.

2. Via the Computer:

For this plug your device to your computer or use Wi-Fi sync option and open iTunes. If you don't have the latest version of iTunes, a notification to download the latest will appear. It is advisable to have the latest version, but if you don't need it, opt for the “Don't Download” option.

Click on the Devices button and select your device. Next, go to the “Backup” section in the bottom. Select “This Computer” option under “Automatically Backup” and then click on “Back Up Now”. This will start the backup on your computer which can be restored again after upgradation of iOS version.

For taking the backup through Wi-Fi, go to “Options” section and select the option “Sync with iPad over this Wi-Fi” and then “Apply”,
