

you can turn on/off Airplane mode, WiFi, BlueTooth, Do Not Disturb or screen rotation. Additionally it gives you access to music player, volume controls and brightness control which could earlier be accessed by tapping twice the Home Button and swiping from left to right. It also holds the new torch feature, timer, calculator and camera.

2. Notification Center

Apple has revamped the Notification Center which is now called Today View. It is accessed by sliding down from the top of the display from Home screen, locked screen or any app. It tells you the date, temperature and a weather overview. It also gives a summary of your appointments and the next day's schedule. You can swipe right on a notification to open the appropriate app, but if you just want to get rid of it, swipe up to hide it.

You can customise the Today View by going to Settings > Notification Center and scroll down to the Today View tab. The options are limited at present, and we hope Apple expands it to give access to third party apps. However, you can turn off the unnecessary features by using the toggle switch provided. For example, not many people really need Stock updates. If so you can un-check it as keeping it up to date eats up a lot of battery. You
