

the preview screen for a second or so locks that exposure setting in the camera; now you can move the camera around and it keeps the selected exposure and focus settings locked. You know it's working when you see a small label appear on the screen that says AE/AF LOCK. Just touch it once to unlock the mode.

Square

Sliding the screen to the right takes you to the Square option. Included due to the fast and rapidly 1:1 ratio of photography made famous by Instagram, this feature makes your camera Instagram ready with a basic set of hipster filters to get you through most styles.

Now control focus and exposure much better

Live Filters

The Live Filters can be used with normal as well as square photographs. A bundle of nine stylish filters: Mono, Tonal, Noir, Fade, Normal, Chroma, Process, Transfer and Instant can be accessed by touching the Borromean sigil (three interlocking circle) icon in the corner that presents nine miniature live view screens of the image through different filters. You can select the filter of your choice and start clicking away.

Zoom

The digital zoom feature has also been revamped. Now you can pinch the screen to zoom not only on still images but also on on-going video recording.

Video

While taking a video you can not only zoom but also use the AE/AF LOCK that we discussed earlier using the same screen tap method. Another advantage in the new features is the ability to take still shots while the
