

Local Music

iTunes Radio. Discoveries ahoy!

directly from iTunes massive library though genre or artist based radio channels. The feature allows you to make your own radio channel and populate it with your taste of music through artist selection or alternatively sign up to any of the ever increasing radio stations that already exist. Given Apple's extensive audio library we can be pretty sure of discoveries. Now if only it were available in India

Siri

After a lot of hype with its initial launch Siri proved underwhelming for many users. But with the iOS 7 setup Siri makes a comeback with a vengeance and some really essential upgrades.

Language

In prior versions the Indian dialect wasn't easily understood by the voice recognition system unless an Americanised accent was adopted. Users were forced to figure out how to add phonetic names to Siri's database and most gave up trying. Now with the new version not only has Siri become
