

adult content or allow only specific websites to be visited from Safari. All you have to do is go to **Settings > General > Restrictions > Enable Restrictions > Enter a Restrictions Passcode > Websites**.

Close Safari tab with a swipe

The new tab switcher of Safari is gorgeous! You'll see a series of cards placed one after other that move with transitions. To delete a tab you can tap the 'x' that appears on the card, or you can simply swipe it to left.

CAMERA

Change camera modes with a swipe

Camera app is included with four modes: Video, Photo, Square and Panorama. To navigate between them open the camera app and swipe left or right on the camera view.

Photo modes

Take photos with filter on

The camera app comes with filters that can be added 'live' on the lens while taking photographs. They're 9 filters named, Mono, Tonal, Noir, Fade, None, Chrome, Process, Transfer and Instant. To add them open the camera app and tap the three circles located at the bottom right.

Take multiple photos in a tap

Called as 'Burst mode' it lets you take multiple photos with a single tap.
