

horsepower is in a data centre and a smart connected device can access this capability from anywhere.” says Dr. Atul Garg (PhD), a senior chip designer at NVIDIA Corporation, Santa Clara, USA. The engineer from IIT Kanpur, who now holds ten design patents to his credit has this final advice for aspirants: “Keep yourself current with state of the art in such a fast moving industry, increase productivity to be in sync with industry trends, and keeping ahead of the competition. Learning is a lifelong process and nothing is impossible if you work hard.”
