

Like any problem solving exercise software testing follows similar methods

– Foundation and Advanced Level. If you're new to Software Testing, then this is the exam for you. It helps you understand the basics and the right process of performing the testing. Know more at <http://www.istqb.in/>

CAST, CSTE and CMST

These certifications require some prior experience in the field of testing. Certified Associate in Software Testing (CAST) is like a foundation level; whereas Certified Software Test Engineer (CSTE) and Certified Manager of Software Testing (CMST) are practitioner's level and managerial level certifications. These certifications are administered by Quality Assurance International (QAI), a US-based international organic certification company. Visit: <http://www.softwarecertifications.org/>

CASQ, CSQA and CMSQ

These certifications majorly focus on the quality side. These certifications are also administered by QAI and information about them is available at <http://www.softwarecertifications.org/>
