

outlook and revealed that they were making little money before their app was featured by Apple.

Final advice

Sreekanth said that he believes that aspiring developers have a wide gamut of options and it's not necessary for an independent developer to produce their own apps. Instead they could also work as consultants and work on app ideas of other people. He added that while developing apps on your own is a risk, the huge number of smartphone users out there means that there are plenty of investment opportunities and users to target.

Rahul emphasised on the importance of coding and comprehending your own code. He said that every developer should enjoy debugging their apps and pushing them towards perfection. He added that developers should participate in forums and discussions and not be afraid of asking questions, even the simplest ones, in order to improve their own understanding of the field.

Nirmit's advice to aspiring developers was to start immediately and allot daily time to work on ideas and apps. Like Rahul, he focused on the importance of feedback and the need to open up to suggestions, in order to help to develop confidence in your own work. Raja and Shanti also talked about having confidence in the products you create but to be prepared for the fact that there was no 'easy money' in app development. To garner success, Raja and Shanti said that developers need to be willing work very hard and put maximum effort into every single app they create.

Choosing between working for a development firm or continuing as indie developers

Nirmit, Sreekanth, Raja and Shanti were all happy in their current profiles as independent developers. Nirmit felt very strongly about the fact that he wouldn't fit into a 9 to 6 job in a development firm. He revealed that
