

PRODUCT	MHASH/S
Avalon ASIC #1	66,300
Avalon ASIC #2	82,000
Axon Synapse Terra-1	3,000,000
BitForce SC 5Gh/s	5,000
BitForce SC 10 Gh/s	10,000
BitForce SC 25 Gh/s	25,000
BitForce Little Single	30,000
BitForce SC 50 Gh/s	50,000
BitForce Single 'SC'	60,000
250 GH/s Rack Mount Bitcoin Miner	250,000
BitForce 500 GH/s Mini Rig SC	500,000
BitFury's	120,000
Bitmine.ch Avalon Clone 85GH	85,000
Black Arrow Prospero X-1	64,000
Black Arrow Prospero X-3	1,344,000
Blue Fury	2,500
Block Erupter Blade	10,752
Block Erupter Cube	30,000
Block Erupter Emerald	336
Block Erupter Sapphire	333
CoinTerra TerraMiner IV	2,000,000
HashBlaster "I" – 20nm	3,300,000
HashFast Baby Jet – First Batch Backorder	400,000
HashFast Baby Jet – Second Batch	400,000
HashFast Sierra - Second Batch	1,200,000
KnCMiner Mercury	100,000
KnC Saturn	250,000
KnC Jupiter	500,000
KnC Neptune	3,000,000
Monarch BPU 300 C	300,000
Monarch BPU 600 C	600,000
TerraHash Klondike 16	4,500
TerraHash Klondike 64	18,000
TerraHash DX Mini (full)	90,000
TerraHash DX Large (full)	180,000
Xtreme Miners Leopard 2.5 Th	2,500,000
Xtreme Miners Tiger 5 Th	5,000,000
Xtreme Miners Lion 7.5 Th	7,500,000

for any other function. These are the fastest sort of mining hardware at the moment. There are some manufacturers like Avalon, ASIC-Miner, Butterfly Labs etc, who have released hardware based on ASIC chips which are highly evolved for bitcoin mining.

For a little comparison on which hardware is better you can check the following link

https://en.bitcoin.it/wiki/Mining_hardware_comparison

Pick your coin

There are a lot of alternatives in the Cryptocurrency universe. Bitcoins have become ridiculously difficult to mine and only ASIC machines are actually worth the effort. Other currencies, however, are catching up. You do have
