

to two 3D printers but is engaged with its user base over social media websites like Facebook.

3Ding

[\[http://www.3ding.in/\]](http://www.3ding.in/)

3Ding is a larger business created as a subsidiary of Redd Robotics in Chennai. They claim to be the only multi-brand retailers of 3D printing equipment across the workflow, from printers to scanners to printing materials as well. They also provide custom designed 3D printers on order and do-it-yourself kits for those interested in setting up a 3D printer at home. They don't work within the design aspect and expect customers to provide them a FDM based STL design file for whatever item needs to be printed,

3Ding as a limited but gradually growing range of objects that can be directly ordered from their website.

however if the file requires changes they are willing to do so at extra cost. Their pricing is based on project-to-project variations with no fixed rates. One of the key priorities for 3Ding is to create more awareness and interest in the 3D phenomenon for which they hold workshops on the subject. If you're in Chennai there is a workshop in mid-March 2014. Check out their website for more details.

3DigiPrints

[\[http://www.3digiprints.com/\]](http://www.3digiprints.com/)

3DigiPrints is an authorised reseller for 3D Systems and operates from Bangalore and Mumbai. They sell two models of the 3D System's line of
