

printers as well as take on custom 3D print jobs on order. Like most 3D print services in India, their design involvement is very limited and they expect a STL file submission from their customers.

3DPrintrionics aims to be a one stop shop for 3D printing solutions.

3DPrintrionics

[\[http://www.3dprintronics.com/\]](http://www.3dprintronics.com/)

3DPrintrionics is an ambitious startup based out of Noida that offers an online 3D printer store that aims to help customers start their own 3D printing at home. They sell all the related paraphernalia of

3D printers from materials to DIY kits. They are heavy proponents of the RepRap Project and work using open source design hardware. They also take custom 3D print projects with minimal design input.

Cycloid

Another promoter of the Open Source Hardware movement, Cycloid System is a Bangalore based company that manufactures and services its own line of 3D printers in India. They also sell 3D print materials in a variety of colours directly to customers. Their 3D printing service division is called C4L which is currently in beta testing mode. They accept customer provided STL or SKP file formats and directly deliver printed items.

Clarity 3D Printing

[\[http://www.clarity3dprinting.com/\]](http://www.clarity3dprinting.com/)

Clarity 3D Printing is based out of Mumbai and solely provides 3D printing service. They provide basic technical assistance and guidelines in the creation of STL files but do not do any designing themselves. Users can submit their files to Clarity and commission a custom print job online.

Imaginarium

[\[http://www.imaginarium.co.in/\]](http://www.imaginarium.co.in/)

Imaginarium is based out of Mumbai and works across numerous industry verticals as a rapid prototyping and rapid manufacturing centre. They work on a range of products such as jewellery, automotives and architec-
