

THE FUTURE OF 3D PRINTING

Is it a brave new world we're looking at?
Or a bubble waiting to burst?

3D printers are definitely going to be responsible for the dawn of the third (or 3D) industrial revolution. We've come a long way from the first one. Ever since the first industrial revolution, factories, tools etc. have been synonymous with manufacturing – mass manufacturing or otherwise. The notion of modern manufacturing being done without factories is in itself an astonishing one. However, this is exactly what is going to happen as 3D printing reaches individuals and small busi-
