

“make-your-own” option with which users can customise the style and dimensions of their frames as well. Other than the usual editing and filter options, PicMix lets you attach cute stickers onto your images to make them just a bit more fun. Images made are by default saved to the Photo Library on a Blackberry and then be posted to social networks and set as

a Blackberry profile photo too.

PhotoStudio

Photo Studio comes with a set of basic tools that measure up to most of your Photoshop usuals. In addition to that, the photo filter options allow you to punch up any image in a matter of seconds. The app also lets you frame and border your images to make collages using any of the more than 29 effects provided. The images are easily posed in Instagram as well as shared on social network sites. The wide variety of options and customisations makes Photo Studio an indispensable app for a photo friendly Blackberry owner. In many cases its free version gives a greater value for money than the unusually high priced

paid version.

Price: Free, Pro Version Rs.199
