

access and RealVNC Viewer for Google Chrome creates a secure VNC link between your Chrome OS and almost all other operating systems.

Keyboard Shortcuts

The keyboard layout of the Chromebook differs from traditional QWERTY layouts. Although the main word processing typing area is formatted the same way, there are numerous replacements of other buttons, especially the F1-F12 keys, in their place you will find Hotkeys which have assigned shortcuts. If you have a Chromebook you can easily press Ctrl+Alt+? to
