

courses on advanced physics, including Classical Mechanics, Quantum Mechanics, Cosmology and General Relativity. The courses are filled with enough Mathematical and Theoretical rigour to give students a satisfactory understanding of these advanced concepts, something that most popular science books and documentaries tend to avoid. These courses may not be everyone's cup of tea, but if you have a high-school or college-level understanding of Mathematics and Physics, you should be fine.

14 **MusicTheory** (<http://dgit.in/FTMusicTheory>)

You may be a fairly proficient guitarist or violinist, but most musicians find that an understanding of music theory goes a long way in writing good music. This website teaches you all you need to know, and then some. Starting with the basics of reading staff notation, identifying time signatures and measures, it takes you onto more 'fun' topics like scales, arpeggios, chords, intervals and chord progressions. While you're unlikely to require all of the stuff that's offered by the site, you can pick and choose the areas that you think will be beneficial to your music and focus on those. The site also has various exercises to test your understanding of the material covered.

15 **Creative Bug** (<http://dgit.in/FTCreativeBug>)

For those of you with an artistic bent of mind, Creative Bug has hundreds of short tutorials covering sewing, origami, painting, quilting and crafts. With specialized sections on creating gifts for babies, birthdays or weddings, those with a flair for making things can find some great gift ideas here. If you're into DIY stuff like accessories, phone cases, wall hangings or frames, Creative Bug has both free and paid sections, with the paid options starting at either \$9.95/month for the whole website or \$9.95 for a single course.

16 **NPTel (National Programme on Technology Enhanced Learning)** (<http://dgit.in/FTNPTel>)

Premier Indian institutes like the IITs and IISc have no dearth of highly skilled professors, and under an initiative funded by the Ministry of HRD, Government of India, they've been providing free video lectures for most courses offered by these institutes. The courses are more focussed towards Engineering, Computer Science, Natural Sciences and Mathematics, though there are a few courses on Humanities and Management
