Fundamentals of Audio Production
\$25
6 Aug 2012
15 lessons, 1.7 hours

Tuts+ hosts a lot of multimedia courses in addition to web design and business.

kittens, so it should come as no surprise that YouTube also hosts a massive collection of educational videos. While plenty of providers host their own channels (Stanford's Education Channel and the New Boston Group's videos are all fantastic), the Education channel by YouTube collects all of them on the same page, sorted by discipline. The channel is an education directory of sorts, with disciplines ranging from medicine, law, business, engineering, humanities, computer science and history. Several videos are general-trivia based, such as "The sound atoms make while bonding" or "The largest prime number", and a handful of TED talks are included as well. It's perfect for when you have a few minutes to spare and want to make yourself that little bit smarter.

20 **Learnstreet** (<http://dgit.in/FTlearnstreet>) and **Codecademy** (<http://www.codecademy.com/>)

The last few years have seen a huge increase in demand for programming lessons aimed at beginners, and two of the websites that are leading this charge are Codecademy and Learnstreet. Both websites are
