

Tufts University

The Tufts University, established in 1852, is a research oriented university which places emphasis on utilising its disci-

plines in public service and active citizenship. The university has had some pretty famous alumni like astronaut Frederick Hauck, singer Tracy Chapman, Journalist Meredith Louise Vieira, and many more.

Its free courses are available under the topics, Producing Films for Social Change, Biology of Water and Health, Contemporary Biosocial Problems in America, and many more.

A few examples of their courses are as follows:

- ▶ **Course:** Producing Films for Social Change
- ▶ **Description:** This is an intensive, hands-on editorial and production course in which students pitch their ideas and then research, report, produce, shoot, write, and edit their own short documentary films on social issues affecting the local community, the U.S., or the world. Readings and discussions focus on current news, media ethics, media literacy, the declining credibility of the press, journalists' responsibilities to the public, social justice issues, First Amendment principles, corporate media ownership, media images of women and people of color, and the powerful role of media (TV news, documentaries, new media, digital storytelling) as tools for civic engagement and positive social change.
- ▶ **Course:** Theories of Public Policy
- ▶ **Description:** This course examines competing theories, models, and analytical frameworks for understanding policymaking. Case study application is used to underscore lessons learned. Knowledge of the basic tools of lawmaking is sharpened. The highlights of this course are: Why government gets involved in some things and not in others, How public problems are framed and described, What criteria are useful in developing and assessing policy choices, and How policy choices and outcomes are mediated and influenced by individuals, organizations and political institutions.
