

correctly the progress bar on the top left fills up accordingly. The interface is superb, simple and clean.

If you are already familiar with the basics of a particular language there is a new feature called the 'placement test' (available in the web version) which approximates your skill level and places you in the appropriate skill level.

Duolingo doubles up as a crowd sourced text translation platform. While using the app, users are actually translating real world documents online. It became open to the public in 2012 and in the two years since has gathered over 25 million users.

For the competitive ones you can add friends and check your progress versus theirs. You can also play against them or against a bot in the updated version. Duolingo is truly addictive and tops the list for a completely free learning tool.

Lumosity

Lumosity is a brain stimulating and training game. It is more of a self development app than an e-learning app. It challenges users to explore as much of their cerebral potential as possible. In addition to that, if you've
