

take part in them you have to enroll yourself or sign up. Lectures can be streamed online or downloaded for offline viewing.

There is a built in download manager to help manage all your downloaded content. That way you can save videos for later, delete ones that you feel you have covered thoroughly. Coursera is ideal for learners on the go. Though it has taken time for Coursera to develop its apps – both Android and iOS, they have been developed almost perfectly. The user interface is well executed and designed and has made learning easy and accessible.

Android - <http://dgit.in/1kyGbqk>

iOS - <http://dgit.in/1pWbukk>

My Open Courses

My Open Courses is the Indian take on Coursera. And when you have a look at all that it has to offer you will agree that it matches up admirably.

After downloading the app you sign in through some form of social media or email. You are presented with a list of categories in the left hand panel. The categories are many ranging from engineering and science to humanities and design. Once the category is selected you can see the list of lectures and the professor who is taking them. The professors are an IIT and IISc lot so you know
